Bodily and Spiritual Hygiene in Medieval and Early Modern Literature Albrecht Classen 2017-03-20 While most people today take hygiene and medicine for granted, they both have had their own history. We can gain deep insights into the pre-modern world by studying its health-care system, its approaches to medicine, and concept of hygiene. Already the early Middle Ages witnessed great interest in bathing (hot and cold), swimming, and good personal hygiene. Medical activities grew over time, but even early medieval monks were already great experts in treating the sick. The contributions examine literary, medical, historical texts and images and probe the information we can glean from them. The interdisciplinary approach of this volume makes it possible to view this large field in a complex and diversified manner, taking into account both early medieval and early modern treatises on medicine, water, bathing, and health. Such a cultural-historical perspective creates a most valuable bridge connecting literary and scientific documents under the umbrella of the history of mentality and history of everyday life. The volume does not aim at idealizing the past, but it definitely intends to deconstruct modern myths about the 'dirty' and 'unhealthy' Middle Ages and early modern age.

Limitations to Plant Root Growth 2012-12-06 In the past 10 years, there has been a resurgence in interest in soil management and conservation of the soil resource. With the knowledge we have accumulated in the past 100 years, there is the possibility of developing new and innovative ways of effectively managing the soil. The emphasis on sustainable agriculture requires that we understand how to utilize the soil as a viable living resource. To meet the world demand for food within the next 50 years requires a healthy and strong soil resource which can sustain production. With the dedication of the National Soil Tilth Laboratory in 1989, it was decided that one contribution the laboratory could make to agri cultural science would be to foster an exchange of information on soil management. The focus of that interchange centers on long-term soil management. If we are to fulfill the goals of sustainable agriculture, environmental quality, and feeding the world, there will have to be an increased understanding of how to effectively manage the soil. Long-term soil management requires integrated and interdisciplinary research to bring all of the information together in terms which would be applicable to all soils. To accomplish this goal a workshop is held each year, with the exchange of information focusing on a single topic within the framework of developing effective strategies for long-term soil management. With the forum to focus on an individual theme each year, the theme for the initial workshop was "Limitations to Plant Root Growth.

An introduction to botany John Lindley 1835

John James Audubon's Journal Of 1826 John James Audubon 2011-07-01 John James Audubon, an early American naturalist and painter, produced one of the greatest works of natural history and art of the nineteenth century, The Birds of America. As the record of the interior story of the making of this monumental work, his journal of 1826 is one of the richest documents in the history of American culture. ø The first accurate transcription of Audubon's 1826 journal, this edition corrects many of the errors, both intentional and unintentional, found in previous editions. Such errors have obscured the figure of Audubon as a man struggling to realize his professional and artistic dreams. When Audubon embarked for Liverpool from New Orleans in 1826, he carried with him more than 250 of his watercolor drawings in a heavy case, a packet of letters of introduction, and many a good reason to believe that he was a fool to be gambling his family's fortunes on so risky and grandiose a venture. These journal entries, conveying with energy and emotion Audubon's experience of risking everything on a dream??Oh, America, Wife, Children and acquaintances, Farewell!??document an American icon's transformation from a beleaguered backwoods artist and naturalist to the man who would become America's premier ornithologist, illustrator of birds, and nature essayist.

Launch Your Self-Publishing Journey Monica F. Anderson 2022-05-09 Why would anyone self-publish? There are many reasons. Some have tried traditional publishing and grown weary of waiting for responses to their submissions and most have witnessed the success stories of countless self-published authors. Those are legitimate reasons to explore self-publishing. Many well-known authors like Margaret Atwood, Robert Kiyosaki, Zane, Beatrix Potter, E.L. James, and Wayne Dyer self-published their way to tremendous literary success. Having the confidence to self-publish does not make you a failure or vain. It gives you more control over how your message reaches readers. There are numerous benefits to self-publishing, including: • Fast track the publishing process. • Retain full ownership of your intellectual property. • Set a competitive price and offer discounts. • The right to decide which format(s) to offer (audio, paperback, e-book). • Keep more of the profits by eliminating gatekeepers. Many authors are doing it successfully, and so can you. With over a dozen published books between them and years of writing experience, Dr. mOe Anderson and Dr. M. Stolard are positioned to help others avoid the mistakes commonly made by self-published authors. In this book, they share a step-by-step guide with clear examples from their publishing successes (and failures). This book bridges the gap between your manuscript and a finished, professional-looking book!

The Palgrave Handbook of Holocaust Literature and Culture Victoria Aarons 2020-01-24 The Palgrave Handbook of Holocaust Literature and Culture reflects current approaches to Holocaust literature that open up future thinking on Holocaust representation. The chapters consider diverse generational perspectives—survivor writing, second and third generation—and genres—memoirs, poetry, novels, graphic narratives, films, video-testimonies, and other forms of literary and cultural expression. In turn, these perspectives create interactions among generations, genres, temporalities, and cultural contexts. The volume also participates in the ongoing project of responding to and talking through moments of rupture and incompleteness that represent an opportunity to contribute to the making of meaning through the continuation of narratives of the past. As such, the chapters in this volume pose options for reading Holocaust texts, offering openings for further discussion and exploration. The inquiring body of interpretive scholarship responding to the Shoah becomes itself a story, a narrative that materially extends our inquiry into that history.

Mathematics Matters in Education Yeping Li 2017-10-03 This book is inspired by Roger E. Howe's contributions to the international communities of mathematics and mathematics education. Renowned for his research contributions in the fields of representation theory, automorphic forms, harmonic analysis, and invariant theory, Dr. Howe has also fundamentally deepened our understanding of the mathematics taught in the early school grades and has challenged and stimulated mathematicians and mathematics educators to work together to examine this part of the mathematical universe more critically and in imaginative new ways. This volume will help summarize and highlight Howe's contributions to several topic areas in mathematics education, demonstrating the possibility and importance of engaging mathematicians in high-impact research in mathematics education, and showcasing the importance of cross-disciplinary collaboration and exchange.

Dow's Dictionary of Railway Quotations Andrew Dow 2006-04-10 Dow's Dictionary of Railway Quotations is an authoritative compendium of quotations about railways from 1608 to the present day. More than 3,400 entries are drawn from over 1,300 writers and speakers and a wide range of original sources both British and American—Acts of Parliament, poetry, songs, journals, advertisements, obituaries, novels, histories, plays, films, office memoranda, speeches, newspapers, television and radio broadcasts, and private documents and conversations. Here Andrew Dow records remarkable, memorable words—from the well-known to the abstruse, from the commonplace to the vital. The selected quotations are arranged by subject matter and searchable by speaker, subject, and keyword. Dow's Dictionary will inform and captivate railway enthusiasts along with readers interested in railway architecture, engineering, geography, and history.

Obelisk Neil Pearson 2007-01-01 Obelisk: A History of Jack Kahane and the Obelisk Press details the history of one of the most extraordinary—and controversial—publishing enterprises of the twentieth century. Publisher simultaneously of the infamous novels of the literary elite as well as low-budget erotica and “dirty books,” Jack Kahane's Obelisk Press published the likes of Henry Miller, James Joyce, Anaïs Nin, and D.H. Lawrence, alongside a lengthy list of censor-baiting eccentrics like N. Reynolds Packard, the New York Daily News' Rome correspondent and the self-styled “Marco Polo of Sex.” Here, for the first time, is the story of this remarkable venture, which captures some of the twentieth century's most outrageous literary personalities and their often scandalous exploits, including the failed golf club society magazine run by Nin, Miller, and Lawrence Durrell and the tortured relationship between Obelisk author Marjorie Firminger and Wyndham Lewis. A richly illustrated cultural history of 1920s Paris, a fully-narrated bibliography of works published by an unforgettable literary institution, and a glimpse into the remarkable life of the Press's creator, Jack Kahane, The Obelisk Press is a publishing event not to be missed by anyone with an interest in twentieth-century literary lives and letters.
