Foundation Zoho Ali Shabdar 2010-03-26 With more than 1.3 million users and growing every week, Zoho.com is a popular online suite of productivity applications that include email, word processor, spreadsheet, accounting, collaboration, social networking and other creative tools. It's basically like having an online version of Microsoft Office, and Google Apps. And do you know what's great about Zoho? It's cost efficient and free depending on the services you choose; it's hosted on their servers; little or no tech support will ever be needed; and it runs nicely on thin clients like netbooks or smartphones like the iPhone. Also, according to CIO Magazine: "[Zoho has] got more applications than Google... The apps they have are richer." Foundation Zoho gets you started with the vibrant Zoho.com and shows you how to use it for day-to-day tasks as well as have fun with it. This book also helps you to utilize Zoho with iPhone or even with Microsoft Office, if you still wish to use it.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

After the Software Wars Keith Curtis 2009 Computers are an advancement whose importance is comparable to the invention of the wheel or movable type. While computers and the Internet have already changed many aspects of our lives, we still live in the dark ages of computing because proprietary software is still the dominant model. One might say that the richest alchemist who ever lived is my former boss, Bill Gates. (Oracle founder Larry Ellison, and Google co-founders Sergey Brin and Larry Page are close behind.) Human knowledge increasingly exists in digital form, so building new and better models requires the software to be improved. People can only share ideas when they also share the software to display and modify them. It is the expanded use of free software that will allow a greater ability for people to work together and increase the pace of progress. This book will demonstrate that a system where anyone can edit, share, and review the body of work will lead not just to something that works, but eventually to the best that the world can achieve! With better cooperation among our scientists, robot-driven cars is just one of the many inventions that will arrive -- pervasive robotics, artificial intelligence, and much faster progress in biology, all of which rely heavily on software. - Publisher.
