Principles and Practice of Clinical Research John I. Gallin 2012 This expanded third edition provides an introduction to the conduct of clinical research as well as more comprehensive and expansive content about the infrastructure necessary for a successful clinical research organization or enterprise. With authors who are experts in clinical research in both the public and private sectors, this publication provides essential information to clinical investigators who wish to develop and conduct well designed patient-based research protocols that comply with rigorous study design, ethical, and regulatory requirements.

Hayes' Principles and Methods of Toxicology A. Wallace Hayes 2014-10-10 Hayes' Principles and Methods of Toxicology has long been established as a reliable reference to the concepts, methodologies, and assessments integral to toxicology. The new sixth edition has been revised and updated while maintaining the same high standards that have made this volume a benchmark resource in the field. With new authors and new chap

Handbook of RNA Biochemistry Roland K. Hartmann 2015-03-31 The second edition of a highly acclaimed handbook and ready reference. Unmatched in its breadth and quality, around 100 specialists from all over the world share their up-to-date expertise

and experiences, including hundreds of protocols, complete with explanations, and hitherto unpublished troubleshooting hints. They cover all modern techniques for the handling, analysis and modification of RNAs and their complexes with proteins. Throughout, they bear the practising bench scientist in mind, providing quick and reliable access to a plethora of solutions for practical questions of RNA research, ranging from simple to highly complex. This broad scope allows the treatment of specialized methods side by side with basic biochemical techniques, making the book a real treasure trove for every researcher experimenting with RNA.

Open Access to Knowledge in Nigeria Kunle Ola 2018-10-17 This book provides an analysis of the legal and policy dimensions of open access to research, education and public sector information with a focus on Nigeria. Kunle shows how open access has evolved across the world and how such initiatives could be implemented in Nigeria and other countries in the developing world. The author argues for a platform where Nigerians are able to freely connect to the 'global library', through the open access dual platforms of self-archiving and open access publishing, thereby providing access to knowledge. The importance of connecting local works to the 'global library' to increase visibility and impact of such works is also underscored. This book furthers our understanding of open educational resources as alternative avenues to accessing education and seeks to foster citizenry participation, good governance, accountability, democratic values and spur creativity and innovation through open governance and access to public sector information. Providing a framework for open access in developing countries, Open Access to Knowledge in Nigeria is an important read for scholars interested in knowledge production in Africa, development of the knowledge economy and the open access and Access to Knowledge movements.

Business Innovation and the Law Marilyn J. Pittard 2013-01-01 Business Innovation and the Law analyses the topical issue of protecting and promoting business research and development. It does so by examining business innovation through the lens of different legal disciplines – intellectual property, labour and employment laws, competition and corporate laws. Evaluating the impact of each of these areas using discipline-specific and industry perspectives, the book also explores questions about whether a more harmonized approach is necessary to provide appropriate protection. Approaches of the common law and civil jurisdictions, particularly the European Union, inform and provide guidance to the analysis of emerging issues in this field. This book provides insights into various approaches taken by both common law and civil law jurisdictions regarding the increasingly blurred line of ownership rights in innovative industries. It traverses various disciplines of law as well as jurisdictions. Using interdisciplinary perspectives to business innovation and inter-jurisdictional comparisons and analysis, this book will appeal to university administrators responsible for intellectual property policy, managers of technology transfer offices in universities, intellectual property lawyers, labour and employment lawyers and competition lawyers.

Mile-High Views Carol Ann Borchert 2013-12-02 Discover the latest developments in serials publication Current advances in technology and research have triggered accelerating change in the state of serials, which makes keeping up-to-date on developments difficult. Mile-High Views: Surveying the Serials Vista: NASIG 2006 presents the leaders of serials publication

providing their perspectives on the state of the world on the future of serials. This compilation includes several superb presentations from the 21st annual North American Serials Interest Group conference held in Denver, Colorado, in May, 2006. Mile-High Views: Surveying the Serials Vista: NASIG 2006 explores serials publication through helpful reviews of cataloging and techniques for implementing various projects. Also included are chapters exploring visions for the future, strategies for practical application of technology and theory, and tactical information to manage employees and economic resources. This book brings readers the world of serials as it is today—and as it will be in the future. Topics in Mile-High Views: Surveying the Serials Vista: NASIG 2006 include: basic and advanced serials cataloging electronic resource license language implementing an institutional repository (IR) impact of digitizing serials in the next ten years details about the success in digitizing Colorado's Historic Newspaper Collection evolving roles in the digital communication system review of the various uses of FRBR alternative citation sources beyond the Web blogs, wikis, and podcasts managing personnel resource description and access (RDA) vendor-sponsored training electronic resource management (ERM) systems practices and principles of good project management Open Access publishing collection development print and online journal cost comparisons and more! Mile-High Views: Surveying the Serials Vista: NASIG 2006 is a horizon-expanding collection that is perfect for librarians, publishers, and commercial vendors interested in the future of serials publication.

Buying in Or Selling Out? Ronald A. Bohlander 2004 Universities were once ivory towers where scholarship and teaching reigned supreme, or so we tell ourselves. Whether they were ever as pure as we think, it is certainly the case that they are pure no longer. Administrators look to patents as they seek money by commercializing faculty discoveries; they pour money into sports with the expectation that these spectacles will somehow bring in revenue; they sign contracts with soda and fast-food companies, legitimizing the dominance of a single brand on campus; and they charge for distance learning courses that they market widely. In this volume, edited by Donald G. Stein, university presidents and others in higher education leadership positions comment on the many connections between business and scholarship when intellectual property and learning is treated as a marketable commodity. Some contributors write about the benefits of these connections in providing much needed resources. Others emphasize that the thirst for profits may bias the type of research that is carried out and the quality of that research. They fear for the future of basic research if faculty are in search of immediate payoffs. The majority of the contributors acknowledge that commercialization is the current reality and has progressed too far to return to the "good old days." They propose guidelines for students and professors to govern commercial activities. Such guidelines can increase the likelihood that quality, openness, and collegiality will remain core academic values.

Scientific Integrity Francis L. Macrina 2014-07-01 This widely adopted textbook provides the essential content and skill-building tools for teaching the responsible conduct of scientific research. Scientific Integrity covers the breadth of concerns faced by scientists: protection of animal and human experimental subjects, scientific publication, intellectual property, conflict of interest,

collaboration, record keeping, mentoring, and the social and ethical responsibilities of scientists. Learning activities and resources designed to elucidate the principles of Scientific Integrity include Dozens of highly relevant, interactive case studies for discussion in class or online Numerous print and online resources covering the newest research guidelines, regulations, mandates and policies Discussion questions, role-playing exercises, and survey tools to promote critical thought Documents including published rules of conduct, sample experimentation protocols, and patent applications The new edition of Scientific Integrity responds to significant recent changes—new mandates, policies, laws, and other developments—in the field of responsible conduct of research. Dr. Macrina plants the seeds of awareness of existing, changing, and emerging standards in scientific conduct and provides the tools to promote critical thinking in the use of that information. Scientific Integrity is the original turnkey text to guide the next generations of scientists as well as practicing researchers in the essential skills and approaches for the responsible conduct of science.

Translating Expertise Marisa L. Conte 2016-08-29 Translating Expertise: The Librarian's Role in Translational Research provides background and context on the CTSA program. Case studies detail routes to librarian involvement in translational research, including collection development, relationships with researchers and administrators, instruction and training, data management, and team science.

The Innovation Imperative Contributing to Productivity, Growth and Well-Being OECD 2015-10-14 Well-timed and targeted innovation boosts productivity, increases economic growth and helps solve societal problems. But how can governments encourage more people to innovate more of the time? And how can government itself be more innovative? The OECD Innovation Strategy provides a set of ...

International Copyright Law and Access to Education in Developing Countries Susan Štrba 2012-08-22 In International Copyright Law and Access to Education in Developing Countries: Exploring Multilateral Legal and Quasi-Legal Solutions, Susan Isiko Štrba demonstrates the challenge of access to printed copyrighted educational and research materials in developing countries and proposes institutional and normative solutions at national and international levels.

The State of Copyright Debora Halbert 2014-02-05 This book seeks to make an intervention into the ongoing debate about the scope and intensity of global copyright laws. While mapping out the primary actors in the context of globalization and the modern political economy of information ownership, the argument is made that alternatives to further expansion of copyright are

necessary. By examining the multiple and competing interests in creating the legal regime of copyright law, this book attempts to map the political economy of copyright in the information age, critique the concentration of ownership that is intrinsic in the status quo, and provide an assessment of the state of the contemporary global copyright landscape and its futures. It draws upon the current narratives of copyright as produced by corporate, government, and political actors and frames these narratives as language games within a global political project to define how information and culture will be shared and exchanged in the future. The text problematizes the relationship of the state to culture, comments on the global flows of culture, and critiques the regulatory apparatus that is in place to commodify culture and align it with the contemporary nation-state. In the end, the possibility of non-commodified and more open futures are explored. *The State of Copyright* will be of particular interest for students and scholars of international political economy, law, political science, anthropology, sociology, cultural studies, library sciences, and communication studies. It also will appeal to a growing popular audience that has taken an interest in the issues of copyright.

U.S. Government Information Policies and Practices--the Pentagon Papers United States. Congress. House. Committee on Government Operations. Foreign Operations and Government Information Subcommittee 1971

Digitize This Book! Gary Hall 2008 In the sciences, the merits and ramifications of open access and the electronic publishing model that gives readers free, irrevocable, worldwide, and perpetual access to research have been vigorously debated. Open access is now increasingly proposed as a valid means of both disseminating knowledge and career advancement. In *Digitize This Book!* Gary Hall presents a timely and ambitious polemic on the potential that open access publishing has to transform both a paper-centric humanities scholarship and the institution of the university itself.

Bioinformatics, Medical Informatics and the Law Contreras, Jorge L. 2022-01-11 In recent years the field of bioinformatics has emerged from the university research laboratory and entered the mainstream healthcare establishment. During this time there has been a rapid increase of legal developments affecting this dynamic field, from Supreme Court decisions radically altering the patentability of informatics inventions to major developments in privacy law both in Europe and the U.S. This edited book strives to offer the reader insight into some of the major legal trends and considerations applicable to these fields today.

Catalog of Federal Domestic Assistance 2007 Identifies and describes specific government assistance opportunities such as loans, grants, counseling, and procurement contracts available under many agencies and programs.

Best Practices for Corporate Libraries Sigrid Kelsey 2011 In this book, experts in the field describe best practices based on their experiences in corporate libraries worldwide. * 44 graphs and figures demonstrating concepts and providing data * Six photographs of library events and services * A glossary of business and library terms * A bibliography for each chapter in the book

Fundamentals of Collection Development and Management Peggy Johnson 2009 Addresses the art of controlling and updating

your library's collection. Discussions of the importance and logistics of electronic resources are integrated throughout the book.

Information Resources in Toxicology P.J. Bert Hakkinen 2009-08-19 This latest version of Information Resources in Toxicology (IRT) continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization, review, and commentary on the information infrastructure of the field. This book is a unique wide-ranging, international, annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. Thoroughly updated, the current edition analyzes technological changes and is rife with online tools and links to Web sites. IRT-IV is highly structured, providing easy access to its information. Among the "hot topics covered are Disaster Preparedness and Management, Nanotechnology, Omics, the Precautionary Principle, Risk Assessment, and Biological, Chemical and Radioactive Terrorism and Warfare are among the designated. • International in scope, with contributions from over 30 countries • Numerous key references and relevant Web links • Concise narratives about toxicologic sub-disciplines • Valuable appendices such as the IUPAC Glossary of Terms in Toxicology • Authored by experts in their respective sub-disciplines within toxicology

Recombinant DNA Research 1978

The Impact of Electronic Publishing David J. Brown 2008 "The title quantifies and the present and future size of the electronic publishing industry, and provides practical data to support investment decisions in electronic media. It serves as an aid for forward planning by all sectors of the industry."--BOOK JACKET.

Technology Innovation Law and Practice: Cases and Materials Theodore Hagelin 2012-01-25 This book is a comprehensive collection of cases, statutes, regulations and readings focused on the commercial development of new technologies, primarily by start-up and early-stage companies. It defines the technology innovation process as the set of decisions and actions by which an invention is transformed from a laboratory prototype into a commercially viable product or process; and defines the technology innovation period as the time between the point of invention (reduction to practice) and the point of market introduction.

Technology Innovation Law and Practice addresses the gap in academic attention paid to the field of technology innovation. The book provides students, faculty and practitioners, both in law and other disciplines, with a single source of in-depth information on the laws that affect the technology innovation process. The book is unique in its interdisciplinary focus, in its emphasis on start-up and early-stage technology companies, and in its combination of instructional and reference materials.

Handbook of Research on Open Source Software: Technological, Economic, and Social Perspectives St.Amant, Kirk 2007-04-30 This handbook of research is one of the few texts to combine Open Source Software (OSS) in public and private sector activities into a single reference source. It examines how the use of OSS affects practices in society, business, government, education, and law.

House of Commons - Business, Innovation and Skills Committee: Open Access - HC 99-I Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee 2013-09-10 The Government's commitment to increasing access to published research findings and its desire to achieve full open access are welcomed in this report from the Business, Innovation and Skills Committee. However, whilst Gold open access - where authors publish their articles in an open access journal that provides free immediate open access to all of its articles on the publisher's website - is a desirable ultimate goal, focusing on it during the transition to a fully open access world is a mistake. The Government and Research Council UK should reconsider their preference for Gold open access during the five year transition period, and give due regard to the evidence of the vital role that Green open access and repositories have to play as the UK moves towards full open access. (Authors opting for Green open access publish in any subscription journal, and then make their peer-reviewed final draft freely accessible online by self-archiving or depositing the article in a repository (either institutional or disciplinary) upon acceptance for publication.) Other recommendations include: promotion of standardisation and compliance across subject and institutional repositories; mitigation against the impact on universities of paying Article Processing Charges out of their own reserves; introduce a reduced VAT rate for e-journals; non-disclosure clauses should not be used in publishing contracts that include the use of public funds; BIS must review its consultation processes to ensure that lessons are learned from the lack of involvement of businesses, particularly SMEs, in the formation of open access policy

Creating the Academic Commons Thomas H. P. Gould 2011-06-14 This volume provides a roadmap for libraries seeking to establish their own Academic Commons, complete with suggestions regarding physical structure and software/hardware options and information regarding the latest technological advances.

Information Practices and Knowledge in Health Celine Paganelli 2022-02-24 In the field of health, information practices and the organization of knowledge constitute a major challenge today. The practices of the medical profession, or of patients, are evolving under the influence of digital technology. At the same time, the way in which medical knowledge is organized, represented and mediated is also evolving. Information Practices and Knowledge in Health addresses the different aspects of the field of specialized medical and health information; it focuses on the informational practices of professionals in the sector, of patients and, more broadly, of citizens with regards to their health. This book also considers the systems that are used for

organizing knowledge in this field.

Biotechnology Annual Review M. Raafat El-Gewely 2006-08-08 Biotechnology is a diverse, complex and rapidly evolving field. Students and experienced researchers alike face the challenges of staying on top of developments in their field of specialty and maintaining a broader overview of the field as a whole. Volumes containing competent reviews on a diverse range of topics in the field fulfill the dual role of broadening and updating biotechnologists' knowledge. The current volume is an excellent example of such a book. The topics covered range from classical issues in biotechnology - such as, recent advances in all-protein chromophore technology- to topics that are focused on coencapsulation of hepatocytes and bone marrow cell. The information presented in this book will therefore will be of great value to both experienced biotechnologists and biotechnologists in training. Includes over 80 illustrations and photographs Discusses the recent developments in biodegradable synthetic polymers Offers a detailed discussion on emerging options in protein bioseparation
